thriving plants • growing yields

PLANT BOOSTER

INCREASE PLANT NUTRIENT ABSORPTION

- A Safer Choice for Humans, Animals and The Environment
- Non-Toxic, Fully Biodegradable
- Made in USA

128 oz / 1 gal / 3.8 L
concentrate for dilution • makes 128 gallons

PESTICIDE-FREE

increased cation
exchange

+

healthier plants

=

larger yields

Vivebloom™ Plant Booster thriving plants • growing yields

Vivebloom is an all-natural liquid solution that increases a plant's ability to absorb nutrients. Apply diluted formula to roots on a regular basis and observe results that include faster growth, increased hardiness, and better disease resistance. Used to help both young plants and mature species increase cation exchange, Vivebloom is nature's alternative to nitrogen-based fertilizers and pesticides.

Directions: Add 1 oz Vivebloom Booster to 1 gallon of water. Apply with sprayer to saturate leaves, limbs, trunks, stalks, etc. every 10-14 days during growth, budding, blooming and growing season. Apply once per month during dormant season.

Precautions: This product is slippery when spilled. Use normal precaution while diluting or spraying. Not for internal consumption.

KEEP OUT OF THE REACH OF CHILDREN.

Ingredients: A natural blend of processed extracts of coconuts, corn, grains, soy, sugarcane, and other plant-derived substances.

FREEZE PROTECTOR

IMPROVE HARDINESS BELOW FREEZING

- A Safer Choice for Humans, Animals and The Environment
- Non-Toxic, Fully Biodegradable
- Made in USA

128 oz / 1 gal / 3.8 L
 concentrate for dilution • makes 128 gallons

PESTICIDE-FREE

Vivebloom™ Freeze Protector *thriving plants • growing yields*

Vivebloom lowers the freezing point for fruit and flowers by several degrees. When low temperatures threaten, spray Vivebloom over leaves and fruit to protect plants—works better than water alone. Vivebloom helps tip the odds in your favor, because a few degrees can be the difference between a total loss and great profit.

Directions: Add 1 oz Vivebloom Freeze Protector to 1 gallon of water. Apply with sprayer to saturate leaves, limbs, trunks, stalks, etc. before or during frost.

Precautions: This product is slippery when spilled. Use normal precaution while diluting or spraying. Not for internal consumption.
